Tribal Emergency Management Association
iTEMA promotes a collaborative, multi-disciplinary approach to coordinate and enhance emergency management, response, and recovery to protect all Tribal communities.
iTEMA...what does the “i” mean?

- Tribal Emergency Management Association (TEMA) was the name chosen by Indian Country via survey results that were sent to all 566 Federally-recognized Tribes.

- The “i” in iTEMA added to emphasize uniqueness.
  - Ambiguous - multiple meanings
  - Lowercase “i” was chosen to show humility.
  - It gives individual ownership in our association
  - “i” becomes one within the context of our Team or TEMA.
  - Stands for: Indian, indigenous, international, inter-Tribal; “i” is a source for information both from the internet and in-person, iTEMA will provide support for incident response, and provide immediate assistance. iTEMA is innovative, inclusive and lastly the “i” (eye) provides vision and looks to the future.
  - Leaving the “i” open to individual interpretation maintains the fundamental intention of the association: to collectively create, sustain, and support a national association from, with, and for all Tribal communities.
