Statistics Laboratory

Policies and Procedures

The StatLab is designed to help researchers on campus and in the Delmarva Region in the use of effective and appropriate statistical techniques in the analysis of data. The StatLab is jointly supported by the Statistics Program of the Food and Resource Economics Department and Research & Data Management Services of the IT-User Services. We have limited resources so we need to establish terms of services and charges for extended service to clients. All proceeds for the STAT Lab go back into the lab to fund students, software, and other supplies. The following is our guidelines for use of the STAT Lab:

**Initial Consultation**  No charge provided the client completes the necessary forms.

The StatLab consultant meets with the client and discusses the statistical problem and other relevant information. The emphasis on this visit is to get all the required information concerning the research, data, and potential analysis. In some cases a solution may come from this visit. The client is required to complete a “Request for Statistical Consulting Form” prior to scheduling an appointment. The relevant forms can be found on our web site: [http://www.udel.edu/FREC/STATLAB](http://www.udel.edu/FREC/STATLAB)

**Second Consultation**  No charge if no other funds are available. After the initial consultation we reserve the right to charge the client if funding is available from grants or project money.

This is an extended discussion on suggested design, techniques, interpretation, or dealing with statistical problems. Some time may be spent working on the problem by Statistical Consultants or the Director prior to the consultation. We hope that many problems will be satisfactorily addressed by the second visit.

**Additional Consultations**  Additional work may require fees. We reserve the right to charge the client for additional work if funds are available from grants or project money.

Issues that require extended work will require support from the client. We will discuss with the client the fees for additional work before moving forward. If the client wishes assistance in data analysis, data manipulation, or collection of the data, it will require a formal contract and funding of Graduate Research Assistants in the Statistics Program.

**Please note:** The StatLab is not designed to teach statistics or serve as a tutor for graduate students. We expect clients to have some background in applied statistics before coming to the lab with questions. We can offer suggestions on resources to help learn statistics or courses that we offer at the undergraduate and graduate level to build skills in statistics.
Use of information in StatLab Review Session (STAT 641)
With permission of the client, some research problems that come to the StatLab will be discussed in the StatLab Review Session. The StatLab Review Session is a once a week seminar during Fall and Spring semesters where graduate students, faculty, and other statisticians meet to discuss interesting statistical problems that come to the StatLab. The client also is invited to attend these sessions. All information will be kept confidential to the extent possible.

Priorities in consulting
From time-to-time the StatLab will need to establish priorities for work depending on the caseload and available limited resources. First priority will be given to paid projects, followed by projects from within the University of Delaware. Clients will be notified if any delays in serves are expected.

StatLab Services are available only during the Fall and Spring semesters at the University of Delaware.

The StatLab assistance is available during the Spring Semester 2002 at the following times and locations:

<table>
<thead>
<tr>
<th>Day</th>
<th>Time</th>
<th>Location</th>
</tr>
</thead>
<tbody>
<tr>
<td>Monday</td>
<td>1:00 to 5:00</td>
<td>201 Townsend Hall</td>
</tr>
<tr>
<td>Wednesday</td>
<td>8:00 to 12:00</td>
<td>002C Smith Hall (RDMS Lab)</td>
</tr>
</tbody>
</table>

To get assistance
Statistical consultation is available by appointment only. Users are requested to submit a brief written statement of the problem to the Laboratory prior to scheduling an appointment. A form is available on our web site and can be mailed, faxed, or attached to an e-mail.

Please send to:

StatLab
213 Townsend Hall
Newark, DE 19717
Voice: 302-831-2512
Fax: 302-831-6243
For e-mails send to: Vicki Taylor (vtaylor@udel.edu) or Dr Lidia Rejto (rejto@udel.edu)
