

Summer vacation is ending, and Brianna and Ciarra Johnson, twin sisters, are preparing for their senior year at Howard High School. In motivating themselves for the upcoming school year,

their mother allows them to have one last party to celebrate the beginning of the school year. Of course they tell their friends to bring a friend, so their final bash of the summer will be a blast.

While mingling with their guests, Brianna is introduced to a handsome gentleman by the name of Bruce Williams. Immediately, Brianna and Bruce exchange phone numbers and prepare for a date to get to know each other. They continue to keep in touch throughout the school year and decide to go to the same college upon graduation. Ciarra also decides to join Brianna and Bruce at the University of Delaware.

Excited about her relationship with Bruce, Brianna introduces Ciarra to Bruce's twin brother, Charles. Similar to Brianna, Ciarra is now experiencing love at first sight. It is not long before Ciarra and Charles are walking to class and eating lunch everyday together. Not long after Brianna and Bruce decide to get married, Ciarra and Charles also get engaged. Upon college graduation, they both get married and pursue careers on opposite coasts of the United States.

Since Brianna and Ciarra are not accustomed to being a part from each other, they talk on the phone everyday. One day, Brianna surprises Ciarra and enlightens her about her expected pregnancy. Surprisingly, Ciarra had been withholding her pregnancy from Brianna until she had surpassed her critical first trimester. They are both excited about their pregnancy and curious what their children will look like. It was later revealed that they were both expecting twins. Many people told Brianna and Ciarra to look in the mirror to obtain the best guess of the phenotype of their children. Will Brianna and Ciarra have identical babies?

Focus Questions:

1. Will both Brianna and Ciarra's children be identical? Why or why not?

2. Will the children have similar personalities, behavior, and attitudes?
