Integrated Science

1. Discuss in detail the locations and sizes of the planets relative to the sun. You may include drawings and diagrams or just a verbal description. Use an example from your laboratory, if possible.
2. Please discuss anything you learned from yesterday's liquid nitrogen demonstration. Did you think the demonstration was interesting or helpful? Why or why not?
3. For either 1) the solar system or 2) the liquid nitrogen demonstration, please give one way you might present the material differently.
