

Name _____
Date _____
Period _____

After being in the salt water for 24 hours the egg looked like this:

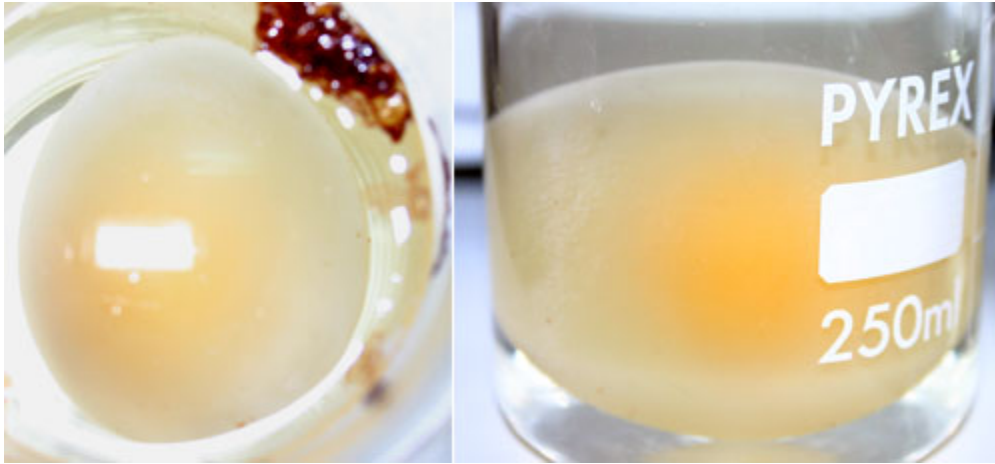

What happened to its size and shape? Was it what you predicted?

After removing the egg from the container you realized that the water level increased. Why would there be more water in the container after taking the egg out then when you put it in? Is this what you predicted?

After being in the distilled water for 24 hours the egg looked like this:

Before

After

What happened to its size? Was it what you predicted?

After removing the egg from the container you realized that the water level decreased. Why would there be less water in the container after taking the egg out then when you put it in? Is this what you predicted?
