

“The Future of the Changing Arctic Ocean: Economic,
Environmental and Legal Implications”

By Magdalena Muir

Visiting Scholar with the Center for Carbon-free Power Integration
and the Mangone Center for Marine Policy

The presentation will focus on economic developments and climate and environmental changes for Arctic Oceans, and implications for legal and policy framework. This will include renewable and non renewable resource development in or affecting oceans, coastal and marine infrastructure, including hydrocarbon and mining development, fishing, ship-based and coastal tourism, shipping and offshore infrastructure, and military and security considerations
