Some people found when they connected their laptop to a receiver and turned on the power that they were getting a message regarding the need to install the PRS Receiver software.

If you see the message – Found New Hardware, and the following pop-up appears:

```
Welcome to the Found New Hardware Wizard
Windows will search for current and updated software by looking on your computer, on the hardware installation CD, or on the Windows Update Web site (with your permission).
Read our privacy policy.

Can Windows connect to Windows Update to search for software?
- Yes, this time only
- Yes, now and every time I connect a device
- No, not this time

Click Next to continue.
```

Select, ->Yes, this time only.

```

Can Windows connect to Windows Update to search for software?
- Yes, this time only
- Yes, now and every time I connect a device
- No, not this time

Click Next to continue.
```

Then select Next. The following pop-up will appear.
Select -> Install the software automatically. (It will look in the files that are on your computer when you first installed the software.)

Select Next.

You should see a pop-up displaying the PRS RF Receiver software being installed. If you see the message below – select -> Continue Anyway.

When it is complete you should see Finish.
This should only happen once, then you should be all set.
