Highlights of the Year

• Early Learning Center
In August of 2002, the University of Delaware purchased the former Girls, Inc. building on Wyoming Road to house the Early Learning Center (ELC). The ELC houses an integrated child care center offering child care as well as educational services to faculty and students at the University. The children enrolled in the ELC will be from a wide variety of backgrounds, and at least 20% of the children served will be children with disabilities. The ELC also provides pre-service training for undergraduate and graduate students in many disciplines, research on children and families, and training and technical assistance to other programs throughout the region. The center officially opened in June of 2004.

• Disabilities Specialists
The Family Support Initiative created an innovative training program for community agencies in the city of Wilmington. In order to address the needs of adults and children with disabilities in the community, members of community agencies participated in the Disability Specialist Fellowship Training. The purpose of the training is to transfer knowledge and resources to those who have had few opportunities to attain leadership positions in the community. In addition to providing new learning opportunities for all staff at the community centers, key community members in participating communities will be training as Disability Specialists who will receive ongoing, up-to-date information and technical assistance.

• Community Connectors
Community Connectors are graduate and undergraduate students who serve as mentors, partners, and liaisons with adults with disabilities. Community Connectors seek out and support people with disabilities who wish to explore their options and become more active citizens in their communities. Whether through volunteer service, art, music, theater, recreation, or other interests, participants will have opportunities to get involved in the community.

• Early Steps to Literacy (State Improvement Grant)
Early Steps to Literacy is an early literacy training project supported by the Delaware Department of Education State Improvement Grant (SIG). A series of six training modules were developed and implemented to provide professional development opportunities for preschool educators, family child care providers, and early education staff throughout the state of Delaware. The goal of the SIG is to divert children at risk due to socioeconomic status from being referred to special education services for delays in speech and language as well as delayed literacy skills.

• Dr. Donald Peters Symposium
A symposium honoring Dr. Donald L. Peters, Amy Rextrew Professor Emeritus of Individual and Family Studies, was held on Friday, April 23, 2004. Dr. Peters retired from the University of Delaware in June 2003 after 18 years as a professor and administrator. He served as both Chair of the Department of Individual and Family Studies and founder and Director of the Center for Disabilities Studies. His 35 years of scholarship, teaching and service have touched thousands of students and professionals at the University of Delaware, Pennsylvania State University, and throughout the country and world.

• Respite Care Report
The Respite Care task force of the Family Support Initiative spent one year examining how respite care is publicly and privately provided in the state, lifespan respite programs in other states, and national legislation reintroduced in 2003 focused on lifespan respite. The task force of parents, caregivers, and professionals in the field drafted recommendations on how to improve lifespan respite care in Delaware.
Preservice Training

The interdisciplinary minor in Disabilities Studies

The minor provides an opportunity for students from a variety of disciplines to gain a substantive introduction to and understanding of the biological, social, and psychological origins and ramifications of disabilities. The program is designed to increase interdisciplinary understanding of disability and provide students, through the senior seminar, with an experience integrating their major with disability issues. Ninety students had completed the minor at the end of June 2004.

Community Training & Technical Assistance

Community Education

Community Education continued offering training, technical assistance, and outreach to Delaware’s disabilities services providers and community organizations. The Positive Behavior Intervention (PBI) Certificate Program was introduced this year because of increasing numbers of Delaware children who require intensive, systematic, and sustained supports in order to remain in the community. The certificate program provides mental health professionals with specialized skills to effectively serve children with challenging behaviors in the community. Program faculty present evidence-based techniques that support adaptive, socially appropriate behavior while reducing the occurrences of inappropriate, destructive behavior.

Research & Evaluation

The Interagency Resource Management Committee Evaluation Project

Through financial support from the Delaware Departments of Education, Health and Social Services, and Services to Children, Youth and their Families, the Center has analyzed the observational data collected from early care and education groups of children and interviews with the teachers of these children. The report, Delaware Early Care and Education Baseline Quality Study, provides information on the educational level and experiences of the current early care and education workforce and the quality of the experiences for children in the early care and education system in Delaware.

Service in the Community

New Directions Early Head Start (NDEHS)

During the 2003-2004 year, NDEHS served 224 children and 21 pregnant women. Some highlights of the year include partnerships with Neighborhood House Inc. and the Early Learning Center. In March 2004, a grant to enhance services provided to pregnant women and newborns was awarded by the March of Dimes. NDEHS also developed a relationship with A.I. duPont Hospital for Children to provide consultation around emotional well-being for infants and toddlers.

Positive Behavior Support (PBS)

Project faculty, Dr. George Bear and Dr. Kathy Minke, revised the School-wide Evaluation Tool (SET) used to evaluate Delaware PBS Schools in the 2003-2004 school year. Most of the original items remain, and a new section was developed to assess social and emotional competencies, as well as some additional evaluation items added under the original sections. The additions focus on increasing family and school collaboration and developing social and emotional competencies. PBS and the FACT project co-sponsored a PBS and Systems of Care conference and jointly attended training in wrap around planning conducted by Dr. Lucille Eber.

Inclusive Schools Initiative (ISI)

ISI partnered with the National Institute on Urban School Improvement to expand our training and technical assistance in inclusive practices. Five pilot schools from across the state begin training in inclusive practices.
Dissemination

CDS participated in a wide range of events to disseminate information on our research, evaluation, and service projects to the community including:

• The Disabilities Awareness Day Picnic
• LIFE Conference
• The Legislative Forum
• The Inclusion Conference

We also tailored presentations, training sessions, and reports to a wide range of community partners as requested.

Our specific dissemination products include:

• **delAware** Two issues of delAware were published in 2003-2004 that focused on the topics of advocacy and mental health.

• **delAware: A Research Brief**

• **Website** The CDS website is regularly updated to include news, events, reports, and publications.

**Publications**

Mann, T. (Ed.) (Summer 2003) delAware.

Visit [www.udel.edu/cds](http://www.udel.edu/cds) for copies of reports and information on all of our dissemination activities.

---

**Financials**

The Center for Disabilities Studies had an operating budget of $6,212,257 from July 1, 2003 to June 30, 2004. Of this total, $3,088,384 was obtained through grants from the U.S. Department of Health and Human Services (DHHS), Administration for Children and Families, Head Start Bureau and Administration on Developmental Disabilities.

The Center also received matching support worth over one million dollars from the University of Delaware in the form of graduate research assistantships and tuition waivers and support of a wide range of projects and activities.

Community & University Partners

Our community and university partners provide invaluable support in meeting our mission. The Core Advisory Council offers policy input and direction to the Center for Disabilities Studies. Members include people with disabilities, families, and representatives from state agencies, service providers, and advocacy organizations.

**Center for Disabilities Studies Core Advisory Council**

- Marie-Anne Aghazadian, Parent Information Center
- Steven Amick, Delaware State Senate
- Martha Brooks, Delaware Department of Education
- Russ Dynes, Department of Public Health
- Micki Edelsohn, Homes For Life Foundation
- Deborah Farris, University of Delaware, ADA office
- Tony Glenn, DFRC, Inc.
- Ann Grunert, Special Olympics Delaware
- Andrea Guest, Division of Vocational Rehabilitation
- Brian Hartman, Delaware Disabilities Law Program
- Linda Heller, Division of Services for Aging & Adults with Physical Disabilities
- Harry Hill, Division for the Visually Impaired
- Peggy Hirsh, Family Member
- Kyle Hodges, State Council for Persons with Disabilities
- Ray Hunt, Independent Resources, Inc.
- Jack Jadach, John G. Leach School, Colonial School District
- Yolanda Jenkins, Division of Child Mental Health Services
- Brenda Kramer, Family Member
- Rita Landgraf, State Council for Persons with Disabilities
- Bill Love, The Arc of Delaware (formerly)
- Raetta McCall, Advocate
- Pat Maichle, Developmental Disabilities Council
- Terry Olson, Mosaic, Inc.
- Alfred Onuonga, HIV/AIDS Services, Delaware Center for Justice

AN EQUAL OPPORTUNITY/AFFIRMATIVE ACTION EMPLOYER — The University of Delaware is committed to assuring equal opportunity to all persons and does not discriminate on the basis of race, color, gender, religion, ancestry, national origin, sexual orientation, veteran status, age, or disability in its educational programs, activities, admissions, or employment practices as required by Title IX of the Education Amendments of 1972, Title VI of the Civil Rights Act of 1964, the Rehabilitation Act of 1973, the Americans with Disabilities Act, other applicable statutes and University policy. Inquiries concerning these statutes and information regarding campus accessibility should be referred to the Affirmative Action Officer, 305 Hullihen Hall, (302) 831-2835 (voice), (302) 831-4563 (TDD).
Letter from the Director

Dear Friends of the Center for Disabilities Studies,

As I think of the accomplishments of the past year, I am reminded of a classic concept from research. When constructing research studies, one always reviews the work that has come before and uses the ideas presented in previous research. Scientists refer to this as standing on the shoulders of giants, referring to those whose work has influenced current research. In physics, we think of Newton and Einstein; in psychology, Erikson and Piaget. A catch phrase even goes along with this concept, “I can see far because I stand on the shoulders of giants.”

At the Center for Disabilities Studies, there are many giants who have helped us. Foremost among them are the people with disabilities and their families who truly allow us to see farther, to understand at a deeper level, and to work more effectively. Those parents and consumers who co-instruct courses, individuals who lead councils, and those who advocate for improvements in services are giants in our communities.

The Center staff and faculty are also giants, who conduct the research, program evaluation, and model services. They are dedicated to working with individuals and families to improve quality of life, services, and supports. They work tirelessly and with great passion.

Without the collaborative efforts of people with disabilities, their families, and the Center staff, we could not have accomplished what you will read about in this report. And after further thought, “giants” is not the right word to describe these individuals—"heroes" is more appropriate. All who participate in our work daily display the quiet, persistent, dedicated behavior necessary to improve the quality of life for all.

As you review the accomplishments of the past year, please remember that what you read about could not have taken place without these heroes.

Sincerely,
