General Level V
Reading & Writing
General V R/W will provide you with a clear understanding of the grammar of English. It will help you develop your ability in the commonly used language skills of reading and writing. This class is excellent for general English development, and it is also a prerequisite course for students who would like to go on to prepare for university studies by taking EAP classes.

Learn to understand what you read and to express your ideas on paper clearly and effectively!
Grammar Textbook Usage:

Students will continue with the Azar text *Understanding and Using English Grammar* (which is used in Level IV), but different topics will be covered. Some of the topics will include: modal verbs, passive structures, adjective & adverb phrases, and gerunds & infinitives. Previously studied topics will be reinforced and developed more deeply.
Reading Textbook Usage:
The text *Raise the Issues*, by Carol Numrich, introduces new vocabulary and has many types of reading comprehension exercises. Moreover, it uses a variety of authentic texts taken from native-speaker publications focusing on controversial issues. This dovetails nicely with our focus on argumentative essay writing.
Contact Information: more information on this class, you may contact Russ Mason at rmason@udel.edu or stop by his office in room # 226 at the 108 East Main Street ELI location.
