^{**} For Introductory Biology to be taken Honors, <u>HNRS</u> NURS majors **must** take BISC 207 Honors and CHEM 103 in place of BISC 205 (not offered honors) and CHEM 105. CHEM 103 is a required co-req. for BISC 207. Honors students who decide to take BISC 205 & CHEM 105 will instead need to take an additional 3 credit Honors course for a total of 17 credits in the fall semester of freshman year in order to complete their honors requirements.

Above is a suggested Honors sequence of courses based upon when course in the NURS curriculum are available in Honors sections. Please note: the General Honors Award requires a min. of 12 credits of Honors in the first-year (including an HNRS ENGL 110 and HNRS Colloquium) with additional Honors coursework in the 2nd year for a combined total of 18 HNRS credits by the end of the 2nd year of study. The Honors Degree requires a min. of 30 Honors credits over 4 years with a min. of 12 HNRS credits in the major, 12 HNRS credits at the 300-level or above (denoted by + above), and including an Honors Degree capstone course (denoted as HNRS Capstone above) in one of the last 2 semesters prior to graduation.
