What do the Numbers mean?

The Term is four numbers, and to understand it we must break it down into three sections.

### Decode the Term Code

- **First digit of the year:**
  - 2000s = 2
  - 1900s = 1
  - For example:
    - 2019 = 2
    - 1998 = 1

- **Term Specific number:**
  - 1 = Winter
  - 3 = Spring
  - 5 = Summer
  - 8 = Fall

- **Last two digits of the year:**
  - 2019 = 19
  - 2020 = 20

This is the standard across UDSIS, the same pattern will be followed for other terms in the system (for example Expected Graduation terms).
