Term selected:

***access control point (ACP)**

Definition:

A location staffed to restrict the entry of unauthorized personnel into a risk area. Access control is normally performed just outside of the risk area. It involves the deployment of vehicles, barricades, or other measures to deny access to a particular area.

Helping Children Cope with Disaster

FEMA and American Red Cross. Rev. March 1993. 4 page brochure.

Provides guidelines to help families develop disaster plans. Includes suggestions for communicating if families are separated during disasters, and tips on family preparedness for evacuations. Family planning is especially useful for fast-moving emergencies that require immediate response.

Available from FEMA: Pub. #L-196 (Camera ready materials available for local printing)
or American Red Cross: ARC 4499 (Packages of 25)

Paquete de Informacion Sobre la Seguridad Contra Incendios Para Uso en la Comunidad

FEMA US Fire Administration, American Red Cross, National Safe Kids Campaign. Mar. 1994. Folder with inserts.

Kit is designed to use in conducting fire safety outreach activities in Spanish-speaking communities. Compendium of materials include coloring activities poster for children, doorknob hang-tag, video scripts for adults and children, sample news releases on fire safety, fact sheets on fire issues, and public service announcements. Materials in both English and Spanish enable those not speaking Spanish to conduct safety outreach activities. Could be adapted for CSEPP use.

Available from American Red Cross: ARC 5033.
