

FEMA's Training Resources Portal Page

Welcome to the Federal Emergency Management Agency's
on-line training facility
at the National Emergency Training Center.

While browsing FEMA's training.fema.gov web site, FEMA may provide links to web pages which are not part of the FEMA web family, or fema.gov domain. These sites are not under FEMA control, and FEMA is not responsible for the information or links you may find there. FEMA is providing these links only as a convenience. The presence of these links on any FEMA website is not intended to imply FEMA endorsement of that site, but to provide a convenient link to relevant sites which are managed by other organizations, companies, or individuals.

Please make a selection from the menu items on the left.

Welcome to the NETC Virtual Campus Student Interface!

Please take the time to review the information available on this page prior to calling or emailing the help desk. It contains much of the information available at the help desk. You may also find the answers to your questions in the Virtual Campus help.

Your browser is Microsoft Internet Explorer 6.0
JavaScript is Enabled

The NETC Virtual Campus is designed for use with Microsoft Internet Explorer 5.5 or higher or Netscape Communicator 4.7 or higher on the Windows operating system.

The Virtual Campus is accessible and may function properly on other browser / operating system combinations but the help desk can not assist with issues arising from using anything but the recommended applications.

Benefits of Animals

Our society benefits from improved efficiency and health care in livestock production systems. Emergency management and other Federal and State departments have traditionally protected these benefits in disasters.

Support for animal agriculture is warranted, as the U.S. animal agriculture industry generates nearly \$90 billion each year. Because agriculture now depends on fewer people to produce our nation's food supply, emergency management systems are of high priority.

Sharing Emergency Plans

We encourage emergency managers and the animal-care community to share their emergency plans. By doing so, expertise and resources necessary for successful disaster response may also be shared.

Question 1 of 45

Time Remaining: 14352 seconds

If you are outside during a landslide, which of the following actions should you take to avoid the landslide?

- a. Go inside and get under a desk, table, or other piece of sturdy furniture
- b. Lie down in a ditch, curl into a tight ball and protect your head
- c. Try to outrun the landslide
- d. Move at right angles to the landslide's direction of flow until you are clear of its path
