Electrical Panel Safety

Electrical panels must remain closed at all times and should only be accessed by Facilities.

Also, just like safety showers, electrical panels must have 3ft of clearance in front of the panel. This means no tables, carts, refrigerators, cardboard boxes, etc., can be placed in front of the panel. If you need a sticker for your panel, please contact EHS.

Wear Lab-Appropriate Clothing

As the weather begins to get warmer, please remember to keep wearing closed-toed shoes and long pants in the lab. The proper clothing will better protect you against broken glass and spilled chemicals. Keep an extra pair of sneakers and an extra pair of pants in your office if you think you might forget!

Also, make sure to wear your lab coats and safety glasses when in the lab, their purpose is to keep you protected!

Spring Cleaning

Now is the time to rid your labs of old chemicals, papers, and supplies. Take time to recycle your old papers and schedule a lab clean up week with your group!

Quarterly lab cleanouts are a way to maintain the lab, update chemical inventory, and provide a safe working environment for everyone.

New Bio Boxes Coming Soon

New Bio boxes will be arriving to your department starting this month. Scan the QR code to see the new process for folding and closing the new boxes.
