Dr. Michael Chajes  
Civil and Environmental Engineering Department  
University of Delaware  
Newark, DE. 19716

October 24, 2005

Dear Michael:

The Bioresources Engineering Department supports the new concentration in Water Resources and Water Quality in the Environmental Engineering undergraduate program. We would welcome more students in EGTE 321- Stormwater Management from the new concentration. In the past a number of environmental engineering majors have taken the course. Any increase in student numbers from the new concentration will not pose a burden to the course or require any additional resources.

Sincerely

A handwritten signature in cursive script, appearing to read "Bill Ritter".

William F. Ritter  
Professor and Chair
