phones to the University
the emergency blue light
possible. Know where
When walking at night,

The University of Delaware participates
in the National Collegiate Emergency
Medical Services Foundation HEARTSafe
Campus program which promotes
Rapid Public Access to Defibrillation.

When walking at night,
use a well-lit route and
try not to walk alone, if
possible. Know where
the emergency blue light
phones to the University
Police are located.

 UDPD uses surveillance
cameras to help keep the
community safe. You will see
the cameras on University
property in parking lots, on
heavily traveled roadways
and walkways, and near
university residence halls and
facilities. These cameras help
the department to provide an
additional layer of security.

Marked railroad crossings are the ONLY
safe places to cross the tracks, and
only when the signals are not flashing.
