

Setting Up a Variable Format Course

A variable format course is a course that meets on-campus in person and is also available on-line for students to access (i.e. can register/take it if in California).

On the basic data tab:

Instruction Mode: VF

We highly suggest that there is some sort of 'free format note' on the course indicating that it is a VF course. Please submit the "Class – free format note request" form found on our website under 'FORMS'.
