Helpful Tips:

- ✓ Students will be able to add themselves to a Wait list from the time of their enrollment appointment through the day before the First Day of Classes for a term. The Wait list job will continue to run through Add/Drop. After the start of classes, students can use the Course Permit form to submit requests to add full courses. It is the departments' discretion to decide the priorities of students existing on the Wait list and of students filling out a Course Permit form to add themselves to a full course.
- ✓ Almost all undergraduate sections will be set up for Wait list, once all open seats are taken students may add themselves to a wait list in WebReg. Should a seat become available, students will not be able to register if there are students already on the wait list for that course. This protects students already on the Wait list, and allows the department to manage enrollment.
- ✓ A nightly Wait list job will automatically move students from the Wait list to Enrolled. If a staff member wishes to manually enroll a student from a Wait list, they will need to drop them from the Wait list, and then enroll them in the course.
- ✓ Students cannot see their Wait list position number, or see who else is on the Wait list. Departments may determine their own priorities for enrolling students from the Wait list by setting reserve caps and by manipulating students' Wait list position numbers.
- ✓ Students can add themselves to multiple Wait lists for the same course, however the Wait list job will not enroll a student if they are already enrolled in the course. If a student, not enrolled in a given course but is on multiple Wait lists for that course, is enrolled in a section by the Wait list job, they will be dropped automatically from all other Wait lists for the same course. Students manually enrolled in a section must be manually be dropped from other Wait lists.
- ✓ If a course section is combined, in addition to the set up described below, departments must contact the Scheduling office to have Wait list numbers updated on the Combined Sections table in order for the Wait list to function properly.
- ✓ Enrollment Restrictions: The system checks if students have met prerequisites before allowing them to add themselves to a Wait list. However, the other enrollment edits (reserve caps, time conflicts, etc.) are not performed until the Wait list job attempts to move student from Wait list to Enrolled.

Auto Enroll from Wait List Cancel if Student Enrolled

Two fields must be updated in order to set a section up for Wait list: Auto Enroll from Wait list and Wait List Capacity.

If the Auto Enroll button is not checked, the Wait list option will not appear to students. This button is also used to trigger the Wait list job. If it was checked, but later unchecked after enrollment begins, then students who are not on the Wait list can take open seats, even if there are students on the Wait list. If the Wait list Capacity field is not filled in, no students can be added to Wait list. Wait list capacity can be as high as 9,999. The total number of Wait listed students will show in the Wait list Capacity Total field.

Unchecking the Auto Enroll button will create the problems outlined above, therefore, it should not be unchecked to provide department staff more time to manage the Wait list. Instead, departments may change the "Add Consent" on the Enrollment tab to "Department Consent" to allow more time for staff to manage the Wait list.

There may be an issue where all Wait listed students have been enrolled in the course, and there are still open seats due to enrolled students dropping, but the section remains in closed status. To update the status to open, department scheduling staff can uncheck the Auto Enroll from Wait list checkbox, click save, then recheck the box to reinstate Wait list. The Enrollment Status will change to open.

The Registrar’s Office will work with IT to place a 30 seat Wait list Capacity on all Undergraduate enrollment sections for the Fall and Spring terms, and to check the “Auto Enroll from Wait List” box. The 30 seat number should not be lowered and the Auto Enroll box should not be unchecked without permission of the Registrar’s Office. Please note that subsequently added undergraduate sections will need to have this box checked and the Wait list Capacity updated. Wait list capacities will also need to be added for any graduate sections that will be utilizing Wait list.

Combined Sections

Both sections must have the appropriate Wait list capacity set and the Auto Enroll from Wait list box checked. In order for Wait list to function properly, the Scheduling Office must update the combined Wait list capacity. Please e-mail schedoffice@udel.edu to ensure the Wait list is set up properly for combined sections.

GRAD & UGRD

A Wait list capacity must be set on the undergraduate section. However, the graduate section is not required to have a Wait list. If the graduate section will also have a Wait list, please e-mail schedoffice@udel.edu to ensure the combined Wait list is set up properly.

Multi Component Sections

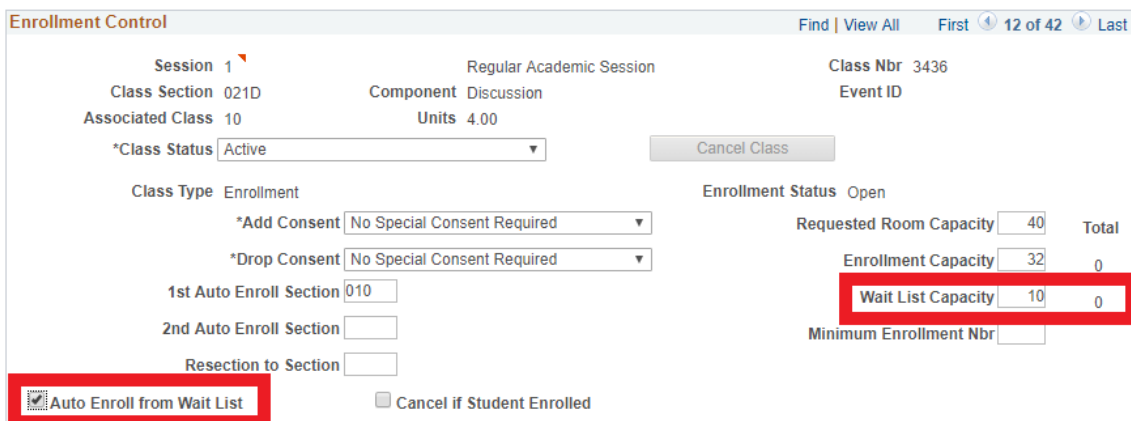

In order for students to add themselves to the Wait list, all components (Enroll and non-enroll) must have a Wait list capacity and have the Auto-Enroll from Wait List button checked.

Auto-Enroll Sections

For example, if a course requires multiple components, a lab (enroll) and a lecture (non-enroll), but the student is automatically enrolled in the corresponding lecture when they choose the lab component.

All components must have a Wait list capacity specified and have the Auto Enroll from Wait list box checked. If the lecture has multiple associated labs, the Wait list capacity for the lecture should equal the combined Wait list capacities of the associated labs.

Free-Choice

For example, if a course requires multiple components, a lecture (enroll) and a lab (non-enroll), but the student is allowed to choose the lab component.

All components must have a Wait list capacity specified and have the Auto Enroll from Wait list box checked. If the lab is the enroll component, and could be combined with any lecture, the Wait list capacity for each lecture should equal the combined Wait list capacities of all labs or be set to 999.

Enrollment Options – Students

Students trying to add a full course with a Wait list option will see a disclaimer message and an “Add to Wait list” box in Webreg:

 In order to add yourself to the wait list you must be meet the pre-requisites for the course. Adding yourself to a wait list does not guarantee enrollment in the course. In order to be enrolled from the wait list, you must be available for the time the course is offered, and you must meet any seat reserves that may be in place on the course. In addition, if you are already enrolled in the course, or if the course would bring you over the maximum course load, you will not be enrolled from the wait list. For more information about waitlists please see our FAQ.

Add to Waitlist Cancel

Once a student adds themselves to a Wait list, it shows with the WL designation in Webreg.

Students can drop themselves from the Wait list by selecting “Drop” in the Action column.

Enrollment Options – Staff

Navigation:

Records and Enrollment > Enroll Students > Enrollment Request

Records and Enrollment > Enroll Students > Quick Enroll a Student

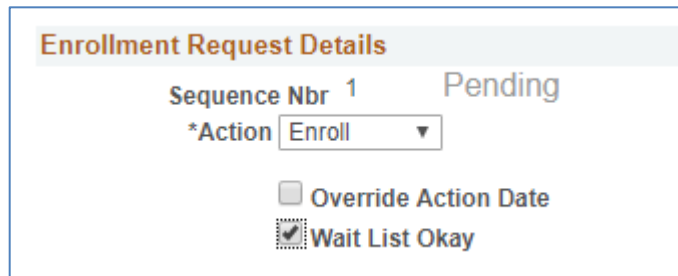

NOTE: Directions below were completed in Enrollment Request, but you can also use Quick Enroll. Once in UDSIS, you can use the folders at the top of the screen to navigate. For information about navigating from the Nav Bar, see Page 2.

Enrollment Actions staff can take include:

- Enroll onto a Wait list
- Change Wait list Position
- Drop to Wait list
- Drop from Wait list
- Enroll into course

Enroll onto Wait list

To add a student directly to a Wait list, in Enrollment Request, Select Action Enroll and check the Wait list OK box.

The screenshot shows the 'Enrollment Request Details' form. It includes a 'Sequence Nbr' of 1 and a status of 'Pending'. The '*Action' dropdown menu is set to 'Enroll'. There are two checkboxes: 'Override Action Date' (unchecked) and 'Wait List Okay' (checked).

Once student is added to Wait list, Success/Messages appears:

The screenshot shows the 'Success/Message' screen. At the top, it displays 'University of Delaware' and '2019 Spring Semester'. Below this, it shows 'Enrollment Request ID 0006646745' and 'Status Success/Messages'. A 'Submit' button is visible. The 'Enrollment Request Details' section shows 'Sequence Nbr 1' and 'Messages'. The '*Action' dropdown is set to 'Enroll'. There are checkboxes for 'Override Action Date' (unchecked) and 'Wait List Okay' (checked). The 'Waitlist Position' is also visible. Below this, the 'Error Messages' section shows a message: 'Class 8958 is Closed. Student placed on Wait List, position number 1. (14640,154)'. The 'Last Update DateTime' is '03/19/19 4:33:15PM'.

Change Wait List Position

- To change the student's wait list position, a staff can select "Change Wait List Position" from the Action dropdown.
- Then, enter the new Wait List Nbr in the text box

Drop from Wait list

Departments may choose to drop a student from a Wait list at any time, we just ask that the student be notified.

If a Wait listed student is going to be enrolled in the course by a staff member, they should be dropped from the Wait list before they are enrolled in the course.

- To drop the student from the Wait list, Staff can select “Drop” from the Action dropdown

***Please note that if they were on Wait lists for other sections of the course, that you should also drop them from those Wait lists.*

Enroll

Staff may choose to enroll a student themselves, rather than wait for the Wait list job.

As noted above, they should first be dropped from the Wait list if they are on the Wait list for the section (see directions above).

- Staff can enroll the student in the course by selecting “Enroll” from the Action dropdown
